DIGITAL LITERACY PROJECT REPORT

Name: Amulya Mehta

Branch: CSE Core

Year: 1st Year

Course Code: CSE0001

Introduction

This project is based on digital literacy and aims to help students understand the importance of using digital tools safely and effectively. As a student digital ambassador, I completed different tasks that focus on awareness, communication, and online safety.

Task 1 – Infographic

For this task, I created a digital literacy infographic using Canva. The main purpose of this infographic is to spread awareness about digital literacy among students. It explains what digital literacy means and why it is important in today's world.

In my infographic, I included topics like safe internet practices, useful digital tools for students, and maintaining a professional online presence. I tried to keep the design simple and easy to understand.

Task 2 – Digital Portfolio

In this task, I created and updated my profiles on platforms like GitHub and LinkedIn. These platforms help in building a professional online presence. GitHub is useful for sharing projects, while LinkedIn helps in networking and career opportunities.

In the future, I plan to use these platforms to improve my skills, connect with professionals, and showcase my work.

Task 3 – Platforms

For this task, I explored online platforms for learning. I created an account on HackerRank and solved a beginner-level problem. This helped me understand how coding platforms work.

I also created a Google Form quiz related to digital literacy. It included questions about safe internet practices and digital tools. This task helped me understand how online tools can be used for learning and collaboration.

Task 4 – Email Etiquette

In this task, I wrote professional emails and created a social media checklist. I learned how to write emails in a proper format with a subject, greeting, and closing

This task helped me understand the importance of clear and respectful communication in a professional environment.

Task 5 – Cybercrime Awareness

In this task, I studied phishing as a type of cybercrime. I learned how attackers try to steal personal information using fake messages and websites.

I also created a prevention checklist to help users stay safe online. This task made me more aware of online risks and how to avoid them.

Conclusion

This project helped me understand the importance of digital literacy in today's world. I learned how to use digital platforms, communicate professionally, and stay safe online. Overall, this project improved my awareness and skills in the digital world.
